PREFACE

Carcinogenesis Abstracts is a publication of the National Cancer Institute. The journal serves as a vehicle through which current documentation of carcinogenesis research highlights are compiled, condensed, and disseminated on a regular basis. It represents an integral part of the Institute's program of fostering and supporting coordinated research into cancer etiology. Issues of *Carcinogenesis Abstracts* normally contain three-hundred abstracts and three-hundred citations (unaccompanied by corresponding abstracts). Abstracts and citations refer to the current scientific literature that describes the most significant carcinogenesis research carried on at the National Cancer Institute, other governmental agencies, and private institutions. *Carcinogenesis Abstracts* is intended to be a highly useful current awareness tool for scientists engaged in carcinogenesis research or related areas. The great number and diversity of publications relevant to carcinogenesis make imperative the availability of this service to investigators whose work requires that they keep abreast with current developments in the field.

Carcinogenesis Abstracts is normally published monthly. Volume XI covers the scientific literature published from Jan 1973 through Dec 1973. A cumulative subject and author index for Volume XI will be published shortly after the final regular issue. The first issue of Volume XI which would normally be dated July 1972 is being dated July 1972 - January 1973. This change is being made so that the date of publication of material included in each issue corresponds to the issue date. This journal is available free of charge to libraries and to individuals who have a professional interest in carcinogenesis. Requests for *Carcinogenesis Abstracts* from qualified individuals should include statements of their relationship to carcinogenesis research. All correspondence should be addressed as follows.

Carcinogenesis Abstracts
Room C-325
Landow Building
National Cancer Institute
National Institutes of Health
Bethesda, Maryland 20014

NOTE

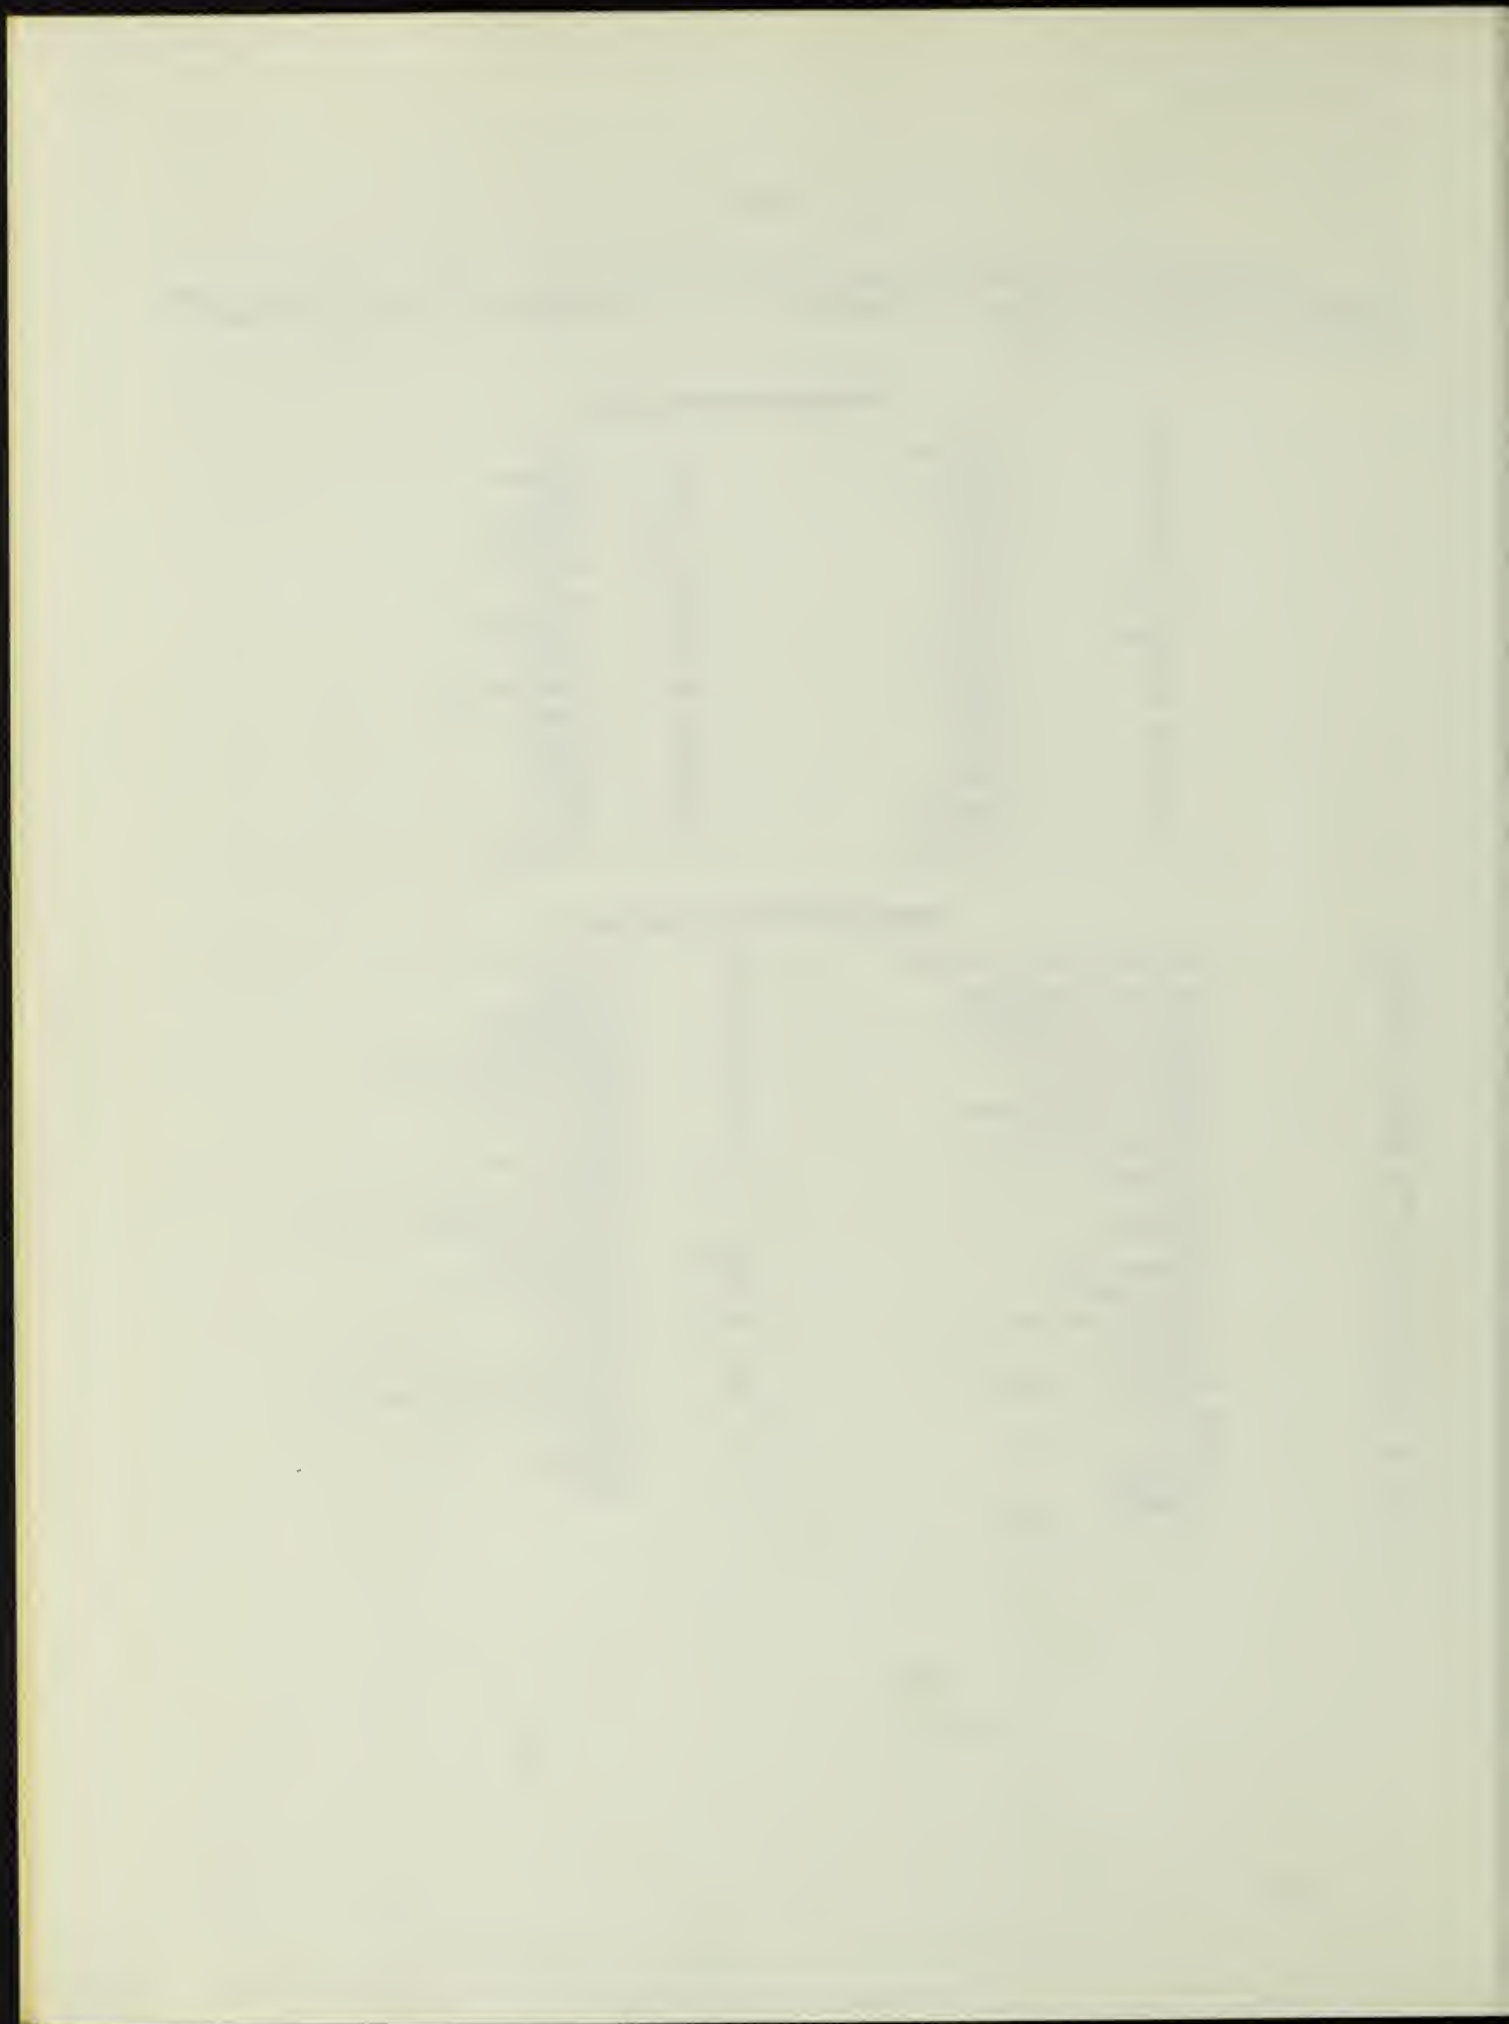

Journal names are abbreviated according to the list of abbreviations used by *Index Medicus*. For journals not covered by *Index Medicus*, the abbreviations (with some modifications) found in *World Medical Periodicals*, 3rd Edition, are used.

LANGUAGE ABBREVIATIONS

ABBREVIATIONS USED IN ABSTRACTS

ACTH	adrenocorticotrophic hormone	mg	milligram(s)
ADP	adenosine diphosphate	min	minute(s)
AMP	adenosine monophosphate	ml	milliliter(s)
ATP	adenosine triphosphate	mm	millimeter(s)
C	degrees centigrade	MTD	maximum tolerated dose
cm	centimeter(s)	ng	nanogram (10 ⁻⁹)
CNS	central nervous system	pg	picogram (10 ⁻¹²)
cpm	counts per minute	p.o.	orally
DNA	deoxyribonucleic acid	ppm	parts per million
e.g.	for example	r	Roentgen
g	gram(s)	RBC	red blood cells (erythrocytes), red blood count
µg	microgram(s)	resp.	respectively
hr	hour(s)	RNA	ribonucleic acid
i.m.	intramuscular	s.c.	subcutaneous
i.p.	intraperitoneal	sec	second(s)
IU	international unit(s)	U	unit(s)
i.v.	intravenous	UV	ultraviolet
kg	kilogram(s)	WBC	white blood cells (leukocytes), white blood count
LD ₅₀	median lethal dose(s)	wk	week(s)
m	meter(s)	wt	weight(s)
M	molar	yr	year(s)
mEq	milliequivalent(s)		
mM	millimolar		
µM	micromolar		
mC, µC	milli-,microcurie(s)

3-METHYLCHOLANTHRENE-TREATED RATS,
2549*
- CYTOCHROME P-448
INDUCTION
POLYCHLORINATED BIPHENYLS, LIVER,
RAT, 1298*
- CYTOCHROME P-450
CONTENT
MICROSOMAL ALTERATION OF
CARCINOGEN MUTAGENICITY, LIVER,
HUMAN, 6072
N-HYDROXYLATION OF 2-
ACETYLAMINOFLUORENE
MOUSE, HAMSTER, 2548*
- MICROSOME
DIMETHYLNITROSAMINE METABOLISM,
MOUSE, 6727
- CYTOCHROME SYNTHESIS
ETHIDIUM BROMIDE
SV40 TRANSFORMED CELLS, HAMSTER,
844
- CYTOKINESIN
TERMINAL CELL DIFFERENTIATION
PLANTS, 5804
- CYTOLOGY
CANCER
MOUSE, HUMAN, 1798*
- CYTOSINE ARABINOSIDE
LEUKEMIA, ACUTE MYELOID
MYELOBLAST CELL CYCLE, CLINICAL
STUDY, 3423*
- LYMPHOSARCOMA
COW, 4193*
- POLYOMA VIRUS-INDUCED SURFACE ANTIGEN
HAMSTER CELLS, 2107
VIRUS, HERPES SIMPLEX
KIDNEY CELLS, RABBIT, HUMAN, 292*
- CYTOSOL
CHROMATIN
BINDING OF ACTINOMYCIN D BY
UTERINE NUCLEI, RAT, 5777
- CYTOSONE
RADIOLYSIS
1-CARBAMYLIMIDAZOLIDONE-4,5-DIOLS,
1916
